ALLENDEVAUX & COMPANY

CYBERSECURITY
AS A SERVICE

Cybersecurity services under one roof!

As cyber attacks continue to rise, it's critical for businesses to implement effective cybersecurity measures to protect their data and systems.

Allendevaux offers **a comprehensive suite of cybersecurity services** to help businesses of all sizes improve their overall cybersecurity posture and reduce the risk of cyber attacks and data breaches.

Why organizations should go for **Cybersecurity as a service?**

Here are some reasons why businesses need cybersecurity as a service:

Protection against cyber attacks:
Cybersecurity as a service helps businesses protect against cyber attacks by identifying vulnerabilities in their systems and applications, implementing effective security measures, and providing ongoing monitoring and threat intelligence.

Compliance with regulations and standards:
Many industries are subject to regulations and standards related to cybersecurity, such as HIPAA, PCI DSS, and GDPR. Cybersecurity as a service can help businesses ensure compliance with these requirements and avoid costly fines and penalties.

Access to expertise and resources:
Cybersecurity as a service provides businesses with access to a team of cybersecurity professionals who have the expertise and resources to identify and mitigate cyber risks.

Scalability and flexibility:
Cybersecurity as a service is scalable and flexible, allowing businesses to adjust their level of protection based on their changing needs and budgets.

Cost-effective:
Cybersecurity as a service is often more cost-effective than building an in-house cybersecurity team, as businesses only pay for the services they need.

Here are some facts and statistics on cybersecurity as a service:

The global cybersecurity as a service market is expected to reach

$46.5 billion

by 2027, growing at a CAGR of **12.5%** from 2020 to 2027

Small and medium-sized businesses (SMBs) are increasingly adopting cybersecurity as a service, with the SMB segment expected to grow at a CAGR of 14.4% from 2020 to 2027

Cybersecurity as a service can reduce the cost of a data breach by an average of

$1.55 million

according to a study by IBM.

95%

of CISOs (Chief Information Security Officers) believe that outsourcing cybersecurity functions is effective in improving security posture, according to a survey by Deloitte.

The top benefits of cybersecurity as a service include enhanced threat detection and response, better compliance and risk management, and improved overall security posture, according to a survey by ESG.

Our Cybersecurity Services

PENETRATION TESTING

Our penetration testing services simulate real-world cyber attacks to identify vulnerabilities in your systems and applications and provide actionable recommendations to improve your overall security posture.

VULNERABILITY MANAGEMENT

Our vulnerability management services help you identify, prioritize, and remediate vulnerabilities in your systems and applications, reducing the risk of cyber attacks and data breaches.

BUG BOUNTY SERVICES

Our bug bounty programs leverage the power of the crowd to identify and remediate vulnerabilities in your applications and systems.

SPEAR PHISHING

Our spear phishing services simulate real-world attacks to identify vulnerabilities in your organization's security awareness training and incident response procedures.

COOKIE AUDITING

Our cookie auditing services help you understand how cookies are being used on your website and identify potential privacy and security risks.

CERTIFICATION TESTING

Our certification testing services assess your systems and applications against industry standards and best practices to ensure compliance and improve your overall cybersecurity posture.

CONFIGURATION BENCHMARKING

Our configuration benchmarking services compare your organization's system configurations against industry standards and best practices to identify vulnerabilities and assess your organization's cybersecurity posture.

Why Choose Allendevaux?

> Experienced cybersecurity professionals with a proven track record of success

> Comprehensive suite of cybersecurity services tailored to meet your organization's unique needs

> Industry-leading tools and technologies to identify vulnerabilities and mitigate risks

> Customized recommendations and action plans to improve your overall cybersecurity posture

> Competitive pricing and flexible service offerings to meet your budget and timeline requirements

Contact us today to learn more about our cybersecurity services and how we can help protect your business from cyber threats.
